

RAIN OUT

WIND SCREEN TREATMENT

RAIN OUT is a multi-functional fluid based on a copolymer organo-mineral liquid providing preventative treatment of surfaces.

RAIN OUT leaves a durable ultra thin film, invisible, with very high level characteristics of "unwetability" and adherence resistance.

RAIN OUT prevents the formation of a water film. Rain or spray pearl as one sails, increasing the visibility du helmsman.

RAIN OUT avoids the adherence of salt, fatty vapours or deposits resulting from atmospheric pollution. Does not cause any alteration in wiper blades, in seals or chrome. It is effective for about 2 months according the frequency of use of the wipers.

RAIN OUT may be applied as often is necessary because it does not build up on the treated.

RAIN OUT does not craze, peel or discolour. The film disappears gradually by abrasion. It can be used on all glass, transparent plastic,

polycarbonate, chrome, steel, stainless, etc, surfaces making them water, stain and spot resistant.

INSTRUCTIONS FOR USE:

RAIN OUT is applied on completely clean, dry surfaces, with all traces of greasy calcareous or scaling substances removed.

Apply **RAIN OUT** on the surface to be treated with a clean rag.

Spread uniformly on the surface in horizontal lines.

Leave to dry.

Apply a second coat in vertical lines.

Leave to dry again.

Wipe the surface with a damp cloth or sprinkle with water.

Then wipe with a clean, dry cloth until the surface becomes clear again.

Ref. 986M - Bottle 125 ml
Shelf Life : 2 years

Keep out of the reach of children. R 36. Irritating to eyes - R 11. Highly flammable. R 67. Vapours may cause drowsiness and dizziness. S 23. Do not breathe vapours. Keep away from sources of ignition - No smoking. S 26. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. S 60. This material and its container must be disposed of as hazardous waste
Always make beforehand, a test with the surface to be treated to determine the compatibility and the time of contact suited.
