

SikaForce®-7800 Red & Blue

SURFACE FILLING AND REPAIR

- Fast sanding
- Erosion resistant
- Easy to mix and apply

BUILDING TRUST

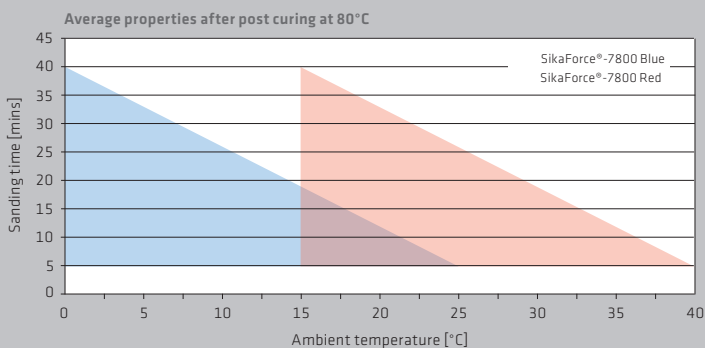

PRODUCT DESCRIPTION

SikaForce®-7800 Red and Blue are two-component polyurethane surface fillers used for final profiling and finishing of wind turbine blades prior to the application of a top paint coat. They are available in co-axial cartridge packaging for use in a standard caulking gun making them easy to extrude, mix and apply. They provide good adhesion to both polyester and epoxy GRP and are also color coded material for product identification to insure the correct product is used for the specific temperature range.

PROCESSING BENEFIT

- Rapid excess stock removal
- Fine dust – no balling
- Clog free abrasive surface after sanding
- Pore free

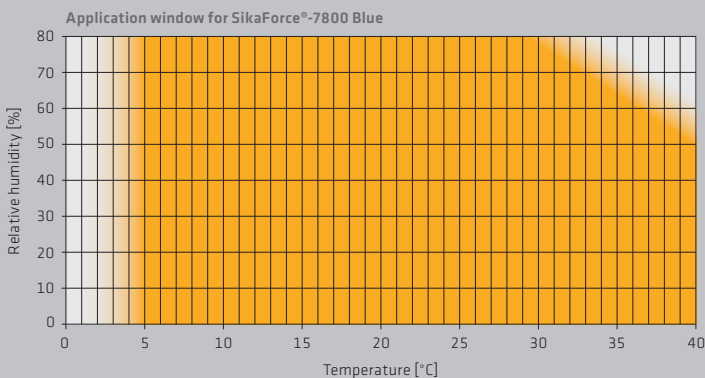

SANDING TIME

- Fast sanding times even at low temperatures
- Both products offer a similar sanding time but at different temperatures

ENVIRONMENTAL CONDITIONS

- Application from +5°C to +35°C
- Moisture resistance up to 80% R.H
