

BIO-ZYM

WATER PURIFIER FOR HOLDING TANKS

Enzymatic doses

BIO ZYM comes as a water-soluble bacteriological dosage which eliminates organic elements on a continuous basis.

BIO ZYM provides a bacteriological balance in line with the effective functioning of water-eva-cuation systems.

BIO ZYM works in three ways:

- Liquefies rapidly all organic waste products (greasy, derived from cellulose, starch, and other carbohydrates and protein materials)
- Prevents pipes being blocked
- Stops unpleasant odours caused by the fermentation of certain types of waste products

BIO ZYM is non-caustic and is 99.99% biodegradable.

Technical Data :

Physical state : Compound

Aspect : Microgranulars.

Colour : yellow

Density : 710 g/l +/-20 g/l

USAGE

Dissolve the dosage in a bucket of warm water. Wait 10 to 15 minutes while the enzymes activate.

Pour into the zone to be treated.

TOILETS

Start by adding three doses for a tank between 100 and 150 litres. Maintain on a regular basis by adding one dose per week.

PIPES

Add two doses every two weeks.

Ref. 926M - 6 x doses of 30 grs
Ref. 926M.K - 50 x doses of 30 grs
Shelf Life : 2 years

P102 Keep out of reach of children. P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. Always make beforehand, a test with the surface to be treated to determine the compatibility and the time of contact suited.
