

SPIDOR

INSTANT RENOVATION CREAM FOR COPPER, BRASS AND BRONZE

SPIDOR is a textured preparation that cleans and emulsifies, using selected micronized surfactants and bulking agents.

SPIDOR has a mechanical micro-polishing action that lifts deposits and removes them from copper and brass without scratching – so it cleans, de-oxidises and renovates with no rubbing.

SPIDOR renovates copper, brass and bronze efficiently by removing verdigris from cuprous metals, and traces of oxidation from brass.

SPIDOR restores its original sheen to the treated surface. Leaves a protective film on the renovated surface.

This inhibits soiling by reducing spattering from water, grease, dust and other materials that cause surface tarnishing or oxidation, or that corrode the metal.

Technical data :

Physical state : cream.

Density: 1260 G/L + Or - 20 G/L.

Colour: beige

Chemical reaction: low acid

Pure pH: 1,50 Approximately.

Smell : practically odourless.

Viscosity Brookfield : 65000 Centipoises,
Motive(Mobile) 7, Speed 10 Tours / minute in 22°C.

Storage: from +5°C to + 40 °C.

INSTRUCTIONS OF USE :

Moisten the surface with water first, so the cleansing is uniform and no areas are scoured excessively. Apply the cream using a soft, lint-free cloth. Cover evenly and leave for about one minute to penetrate the deposits. Before the product has dried completely, rub lightly and polish with a clean, dry cloth to remove all traces of the cream. Leaves the surface shiny.

Note:

1/ Reapply to heavily oxidised areas.

2/ If the cream dries on the surface, moisten first with clean water, then reapply, ensuring you cover the dried-out residue.

Ref. 121M - Can 166 grs
Shelf Life : 2 years

P102 Keep out of reach of children. P260 Do not breathe vapours. P262 Do not get in eyes, on skin, or on clothing. P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. Always make beforehand, a test with the surface to be treated to determine the compatibility and the time of contact suited
