

Developed in collaboration with the French National Sailing School and competitors, this light and self-adhesive speed grip TBS meets the security needs for crews on boats with very bald decks (skiffs, sailing dinghy).

Speed Grip is combined with a new generation of self-adhesive film which has been tested for TBS by tens of racing boats around the world.

This non-slip covering will provide security to crew members in transitional positions
Its smooth and soft composition won't damage your skin, your wetsuit or your sails.

PERFORMANCE TESTS :

Flexibility distortion : 180 % before breakage

Abrasion : 640 mm³ .

Elongation : 24 kg/cm²

Tests made by the Bridge and Roadway Agency laboratory from Angers – France PONTS et CHAUSSEES D'ANGERS - LNE

SPEED GRIP –

Self-adhesive ultra-light non-slip foam

APPLICATIONS :

Sailing dinghys
Catamarans
Skiffs
Boat decks

CHARACTERISTICS :

Self-adhesive foam

Thickness : 2 mm

Weight : 0,24 g/cm³

Hardness : 48 shore A

Installation : Good adhesion on smooth, clean, grease free and dry surface such as GRP, painted or varnished wood, aluminum, stainless steel, ABS, carbon epoxy (make tests before).

Not for PE – PP roto moulded surfaces

Ease of maintenance : clean regularly with water and traditional detergents. For inside factories and shops, the use of biodegradable detergents with a pH of 9 is recommended.

Storage : in the original packaging, protected from humidity. Manipulate with temperatures between +5°C and +30°C.

SIZES :

100 MM X 1,4 M

300 MM X 1,4 M

600 MM X 1,4 M
