Available in discs and sheets. See pages 2-3.

Our best performing abrasives!

5 Reasons to switch to Cubitron™ II abrasives:

- Cuts 30% faster than conventional ceramic abrasives with less technician effort.
- 2 Lasts twice as long as other highperformance abrasives because of 3M patented technology.
- Runs cooler than conventional abrasives, resulting in lower chance of warping the panel or degrading the metal.
- Delivers a finer, more-uniform finish than conventional abrasives.
- Saves time and money with improved productivity.

3M technologies applied to Cubitron™ II abrasives

3M has decades of experience creating minerals that match hardness and toughness of the mineral to the application.

Microreplication allows the same mineral structure to be repeated for all 3M Precision-Shaped Grains.

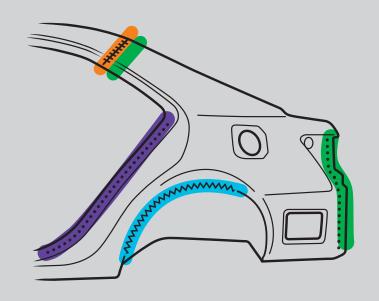

Precision processing deposits uniform mineral structures on the right locations, regardless of the product substrate.

Choose the right 3M product for the right application.

Surface preparation

3M Precision-Shaped Grain continuously fractures to form sharp points and edges - slicing cleaner, faster, staying cooler and lasting many times longer.

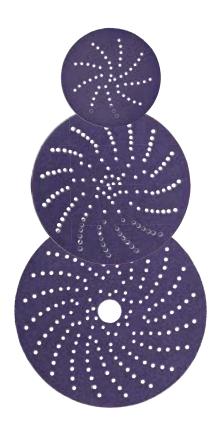

3M[™] Cubitron[™] II Hookit[™] Clean Sanding Abrasive Discs 737U

Use for paint stripping, body filler sanding and feather edging. 3M Precision-Shaped Grain slices through paint and body filler, wears evenly, and provides long life and consistency. Discs utilise the 3M™ Hookit[™] Attachment System for simple application and easy reuse.

Spot weld removal

3M[™] Cubitron[™] II File Belts are ideally suited for use with the 3M[™] File Belt Sander for a variety of metalworking applications in the auto bodyshop.

3M™ Cubitron™ II File Belts

Our most advanced file belts for use with the 3M™ File Belt Sander as an alternative to spot weld drilling, providing improved control and ease of use for spot weld removal and many common body shop metal grinding applications. 3M Precision-Shaped Grain technology provides improved cut, a more consistent finish and two times more belt life while running cooler than conventional ceramic abrasives.

Weld grinding

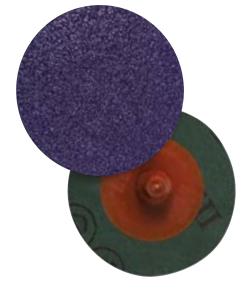

Abrasive Discs

Versatility is key to productivity. With 3M™ Roloc™ Discs, a quick 1/2 turn on, 1/2 turn off speeds up disc changing. 3M™ Flap Discs, 3M™ Fibre Discs (page 9) and 3M™ File Belts (pages 4–5) can also be used for weld grinding.

3M[™] Cubitron[™] II Roloc[™] Fibre Discs 786C

Our most advanced Roloc disc, the 3M™ Cubitron™ II Roloc™ Fibre Disc is designed for heavy duty metalworking applications such as weld grinding and clean-up. Features rigid fibre backing for increased cut performance.

Abrasive Discs and Sheets

3M™ Cubitron™ II Cut-Off Wheels

Used for cutting body panels, frame rails, exhaust pipes, sheet metal and rusted bolts. 3M™ Cubitron™ II Cut-Off Wheels are designed to deliver excellent results. Constructed with the innovative Cubitron™ technology; its triangular-shaped grain offers higher initial cut, faster cutting, longer life and cooler running performance.

3M™ Cubitron™ II File Belts

3M™ Cubitron™ II Belts are ideal for grinding and spot weld removal applications. 3M's Precision-Shaped Grain technology provides improved cut, a more consistent finish with outstanding performance. Optimised metalwork performance achieved when combined with the 3M™ File Belt Sander.

3M™ Cubitron™ II Roloc™ Fibre Discs

3M™ Cubitron™ II Roloc™ Fibre Discs deliver superior performance. Designed for heavy duty metal working applications such as weld grinding and clean-up. The reinforced fibre backing guarantees long disc life and an increase in cut performance.

3M™ Cubitron™ II Hookit™ Abrasive Flap Discs

Combining 3M's Precision-Shaped Grain technology with a durable yet flexible backing; the 3M™ Cubitron™ II Flap Disc is an outstanding choice for rapidly removing welds, grinding edges, finishing metal and removing paint. The Cubitron™ II Flap Disc grinds and blends in a single step, offers longer life and durability for heavy grinding, runs cooler and requires less pressure than other conventional abrasive discs.

3M™ Cubitron™ II Abrasive Fibre Discs

The 3M™ Precision-Shaped Grain technology used in our 3M™ Cubitron™ II Fibre Discs allows for faster cutting of welds, paint and door skin removal. When stripping paint, the improved construction resists loading while generating less heat.

E 3M[™] Cubitron[™] II Hookit[™] Clean Sanding **Abrasive Discs 737U**

3M™ Cubitron™ II Hookit™ Clean Sanding Abrasive Discs 737U offer incredibly high performance and increased productivity. Used for paint stripping, sanding body filler and feather edging. With 3M's revolutionary Precision-Shaped Grain technology, 3M™ Cubitron™ II discs slice through paint and body filler, delivering outstanding sanding performance.

3M[™] Body Repair Tools

3M™ Mini File Belt Sander and File Belt Sander

3M™ File Belt Sanders allow technicians to access hard-to-reach areas and are great for spot weld removal, deburring, cleaning, and finishing. Remove spot welds cleanly and quickly with 3M™ Cubitron™ II File Belts — replacing the need for expensive drills and bits. Adjustable arm for user comfort and multiple applications. Available in 330mm and 457mm sizes.

High quality repair for sustainable quality.

The new Fast Cure Epoxy Metal Filler is suitable for surface damage, in the form of dents, deformations or welded parts. With room temperature processing, 3M™ Fast Cure Epoxy Metal Filler replaces conventional processes with flame usage removed. This lead-free product complies with current EU regulations.

Ordering information

Part no.	Description	Size	Units per pack	Packs per case
37455	3M [™] Fast Cure Epoxy Metal Filler	180ml	1 cartridge + 1 nozzle	6 cartridges + 6 nozzles
51875	3M [™] Static Mixing Nozzle for 37455	-	1 bag of 10 nozzles	5 bags of 10 nozzles
08984	3M [™] Adhesive Cleaner	1 litre	1 bottle	12 bottles

Properties

- ► Sandable after 20 minutes with accelerated drying; Air drying 4 hours (at 22°C) at maximum surface temperature 70°C
- ► For steel, zinc and aluminium surfaces
- ► Very good sandability and excellent corrosion protection
- ► Material can be applied to and will adhere to itself

Advantages

- ► Cost reduction through fast-drying curing process
- Required amount of material on demand
- ► Applied directly on the work surface

Classic tin soldering repair:

- Ingredients such as lead and tin are harmful to your health and do not meet the current EU regulations
- Processes with many individual steps provide an increased risk of error and extra cost

Traditional polyester filler:

- ► Polyester material is hygroscopic versus epoxy resin material => corrosion protection
- ► Epoxy material gives superior corrosion protection
- Manually mixing leads to excessive waste. The 3M applicator minimises waste of material.

Plastic repair

3M[™] Multi Purpose Flexible Repair Material / EZ Sand

Two-part epoxy used to repair most flexible parts. May also be used as a seam sealer where a rounded edge seam is required. This semi-flowable material creates the perfect bead matching many OEM applications.

Part no.	ltem	Colour	Size	Units per case
05887	Multi Purpose /	0	200ml	6
35887	EZ Sand	Grey -	48.5ml	
04908	Nozzle		for 48.5ml	6
08193	Nozzle		for 200ml	36

3M™ Instant Plastic Repair Patch

Used to reinforce the inside of a two-sided plastic repair of minor bumper damage that pierces the plastic. A high performance, flexible TPO (thermoplastic polyolefin) patch provides a strong backside reinforcement repair for most plastics.

Part no.	Description	Colour	Size	Units per case
05888	Flexible Bumper Patch Kit	Black	101mm x 203mm	36
06396	Adhesion Promoter Sachet			100

3M™ Super Fast Plastic Repair Adhesive

3M™ Superfast Plastic Adhesive is a two-part urethane adhesive suitable to repair, rebuild, reshape and bond all kinds of plastic. Fast to cure, it can be sanded and overpainted.

Part no.	Item	Colour	Size	Work time	Units per case
55045	Superfast Plastic Adhesive	Clear	40.5	00 1	40
04748	Superfast Plastic Adhesive	Black	48.5ml	20 seconds	12
34240	Superfast Plastic Adhesive	Black	48.5ml	60 seconds	12
04908	Nozzle				50

3M™ Flexible Parts Repair Material

3M™ Flexible Parts Repair Material (FPRM) is a two-part epoxy filler used to repair most of the plastic parts on today's vehicles. It is flexible and easy to sand. Available in either a 2 tube format for manual mixing, or a duopack cartridge which guarantees accurate and consistent mix ratios and product performance

- Easy to use
- **Excellent feather edging**
- Excellent sag resistance

For easy and safe application with 3M[™] manual applicator (08190).

Part no.	Item	Colour	Dimension	Units per case
05900	Flexible parts repair material	Grey	2 × 150ml	6
05901	Flexible parts repair material	Grey	48.5ml	12
08198	Nozzle			60

Did you know?

- Using 3M super fast adhesive on the front side of a flexible patch repair before skim coating with 3M EZ sand repair material 05887 adds strength and rigidity thus expanding the utility of the flexible repair patch.
- 3M plastic repair products use both urethane and epoxy technology to provide strength, flexibility and excellent sanding qualities.
- When unknown plastics require special attention due to adhesion issues 3M panel bonding adhesive 08115 can be an excellent repair solution.
- When repairing semi rigid reinforced plastics such as RIM (reinforced injection molded) you use the same method and 3M plastic repair products as with flexible plastic such as PP (polypropylene) or TPO (thermoplastic polyolefin).

3M™ Structural Plastic Adhesive

Two part urethane adhesive in a 200ml cartridge, designed for bonding, back side reinforcing and some cosmetic filling of many plastic parts. Bonds to plastic, fiberglass, ceramic, metal and most substrates. This adhesive gives a longer working time and longer drying time than 3M™ Superfast Adhesive to give more flexibility for users needing extra time.

Part no.	Item	Dimension	Units per pack	Packs per case
55047	Structural Plastic Adhesive	200ml	1	6

3M™ Plastic Filler

A polyester-based filler specifically designed for plastic repairs. A smooth, flexible product which is easy to spread and has good sandability.

Adhesives

3M™ Panel Bonding Adhesive

Two-part epoxy adhesive which provides extended work-time but can be rapidly cured with heat. Excellent adhesion to a wide variety of plastic and metal substrates. When the manufacturer's directions are followed, this product can be used to bond door skins, roof skins, quarter panels and box sides.

Part no.	Size	Colour	Chemistry	Work Time	Clamp/Handling Time	Cure Time	Units per case

08116	200ml	Black	Ероху	120 min @ 23°C	6 hrs (may be accelerated with heat)	24 hrs	6

Two-part epoxy adhesive providing an extended work time, but can be rapidly cured with heat. Excellent adhesion to a wide variety of properly prepared automotive substrates including steel and aluminium. Intended for true structural bonding applications when specified by automotive OEMs. Recommended for all weld-bonded and rivet-bonded joints.

Part no.	Size	Colour	Chemistry	Work Time	Clamp/Handling Time	Cure Time	Units per case

3M™ Panel Bonding Adhesive

⊘3M[™] Impact Resistant Structural Adhesive

Details	PN 08115 / 08116	PN 07333
Higher impact strength versus traditional bonding adhesives		
Recommended by many OEMs	⊘	⊘
Provides corrosion protection with lifetime warranty	Ø	⊘
Room temperature curing (accelerated with heat)	Ø	⊘
Can be weld bonded or rivet bonded within working time	Ø	Ø
Adheres to a wide variety of properly prepared steel and aluminium substrates	Ø	⊘
May be used on many plastic and composite substrates	Ø	
Dispenses silver, color changes to purple to indicate proper mixing and curing process has begun		⊘
Glass bead technology protects against overclamping and maintains a minimum bond line thickness	Ø	⊘
Has excellent shelf life opened or unopened, reducing unused product replacement costs	Ø	Ø

Following OEM recommendations is very important for several reasons:

Help ensure safety	Meet the adhesive standards that have been set by the OEMs to manage crash energy and help protect occupants.
Use trusted products	Use products that have been rigorously tested to the OEM's performance requirements for strength and corrosion resistance.
Mitigate risk	Help protect yourself and your business from potential liability — the vehicle was repaired as directed by the OEM.
Simplify your process	Eliminate confusion about which adhesive should be used and where. You're using the OEM recommended adhesive that is specifically called out for that procedure.
Get reimbursed	OEM recommendations, which include 3M products, enable you to provide documentation to justify correct product usage and procedures needed for safe and responsible repairs.

OEM Recommendations

3M PN	Fiat/ Chrysler	Ford	General Motors	Honda	Hyundai/ Kia	Jaguar/ Land Rover	Nissan	Tesla	Toyota	Volvo

08116	Ø		Ø							Ø
07333			Ø	Ø	Ø	Ø		Ø		Ø

This information was compiled by reviewing OEM repair manuals during 2018 and it generally represents model years 2016 to present. Repair facilities must complete their own research to validate current OEM guidelines.

For Impact Resistant Structural Adhesive

One-part seam sealers

3M™ Urethane and Seam Sealers

A high performance seam sealer ideal for sealing interior and exterior automotive and seams and joints. Adheres well to properly prepared bare metal, primer and e-coat surfaces. May be welded through using spot welding equipment. Can be smoothed to a featheredge and/or brushed. Reduces the risk of redos associated with the use of solvent-based seam sealers.

- High solids, single-component, moisture-curing
- Non-shrinking and non-cracking
- Low odour
- Able to fill large voids
- Tack-free and paintable in 30-45 minutes
- May be used in direct to bare metal and aluminium applications

08788		White			

Did you know?

- 3M polyurethane and seam sealers can be used to replicate OEM liquid applied sound deadener applications.
- Due to the flexibility of caulk grade 3M polyurethane and seam sealers it is best to apply minimal amounts of primer over seam sealer. If heavy primer surfacer is required be sure to add flex agent to the primer to prevent paint film cracking due to body deflection.
- You can weld through uncured caulk grade 3M polyurethane and seam sealers using squeeze type resistance spot welding to form a weld sealed joint.
- Many different appearances of polyurethane seam sealer can be obtained using a pneumatic applicator and some simple techniques to match OEM appearance.

Two-part seam sealers

3M[™] Multi Purpose Flexible Repair Material / EZ Sand

Two-part epoxy used to repair most flexible parts. May also be used as a seam sealer where a rounded edge seam is required. This semiflowable material creates the perfect bead matching many OEM applications.

Part No.	Color	Size	Units per Case
05887	Grey	200ml	6
35887	Grey	48.5ml	6

Did you know?

- When "equalising" low viscosity two-part sealers and adhesives you should always position them upright for a few minutes and "equalise" in an upright orientation dispensing material through the mixing nozzle to avoid air bubbles and maintain proper equalisation. CAUTION: During equalisation point the nozzle away from any person or body parts to avoid accidental exposure.
- The use of aerosol type single component primer is not recommended under 3M seam sealer. Always use a two component urethane or epoxy primer in direct contact with the seam sealer.
- 3M™ EZ Sand Multi Purpose Repair Material 05887 works very well as a roof ditch sealer.

- 3M two-part seam sealers may be "tooled" or removed using a VOC Compliant Adhesive Remover without affecting the cure property of the sealers.
- 3M two-part seam sealers can be used to make sealer bead replicas off the vehicle and then attached to the vehicle after curing by using the same material they have been formed with. Scan code to watch demo.

Anti-Chip Coatings

3M[™] Body Gard Textured Coatings

This rubber-based coating was developed to enable most manufacturers' stone chip finishes to be reproduced in the bodyshop. Black, white and grey coatings are available for application to any part of the car requiring stone chip protection. Medium to heavy textures can be obtained depending on the application method used.

- Excellent stone chip resistance.
- High solids.
- Can be used with the 3M[™] Accuspray[™] Pressurised HGP Spray Gun (16587) to replicate OEM finishes.
- Coating becomes tack free in 10-15 minutes. Can be painted with air drying and low bake paints after two hours at normal temperatures. The application of a primer is recommended.

3M™ Banded Ear Plugs

Protection: Against harmful noise, especially in hot/humid conditions. **Features:** Innovative flexible band concept, designed to provide optimum fit and greater comfort. Easy to put on, can be worn under the chin or behind the head for increased convenience. The plugs, which can be reordered with 3M part number (1311), are made from soft non-allergenic material. The band is designed to adjust to head and jaw movement.

Applications: When frequently entering/exiting noisy areas, or intermittent noise is present.

Approvals: Complies with European Standard EN 352-2:1993

SNR = 26dB. CE Marked.

X4A	_	Bright Green	33dB	_	
X5A	_	Black	37dB	_	

^{*3}M strongly recommends fit testing of hearing protectors. Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earmuff fit, earmuff fitting skill and motivation of the user. If the NRR is used to estimate typical workplace protection, 3M recommends that the NRR be reduced by 50% or in accordance with applicable regulations.

3M™ Paintshop Respirator Kit

Protection: Against organic vapours and particulates.

Features: Premium quality, durable paint spray respirator with bayonet filter attachment system. Spare parts available for maintenance. Face Seal Cleaner (105) available for hygiene. **Typical Applications:** Paint mixing, degreasing, application

of coatings, adhesives and sealers.

Approvals: Meets EN 140 and 141/143 with bayonet filters. CE Marked.

Starter pack contains:

1 Face Piece; 2 x each Organic Vapour Cartridges (06915); 2 x each Particulate Filters – P2 (06925); 2 x each Filter Retainers (501) 10 x Face Seal Cleaners (06775).

06783	Starter Pack	Large	AZPZ		

3M™ Disposable Respirator 06920

Protection: Provides effective protection from fine lung

damaging dusts and ozone up to 10 x WEL.

Features: Activated carbon layers to protect against ozone.

Collapse resistant design with flame retardant shell.

Robust design with adjustable straps.

Approvals: Meets EN 149:2001. CE Marked.

Part no.	Item	Туре	Classification	Units per pack	Packs per case
06920	Disposable Respirator	Valved	FFP2	5	4

3M[™] Aura[™] Particulate Respirators

Protection: provides effective protection from fine dusts/mists.

Features: Three panel design providing optimal soft and secure feel on face, designed for excellent compatibility with 3M eyewear, well balanced pressure of head straps, soft nose foam and adjustable nose clip. The valved version has an exhalation valve which helps provide added comfort and heat reduction for hot and humid work environments.

Typical applications: hand and machine sanding and grinding operations. Valved versions especially in hot or humid conditions.

Approvals: meets EN 149:2001. CE Marked.

3M™ G500 Headgear

Provides a versatile and comfortable solution for wearers who require both face and hearing protection. The G500V5FH combines a PELTOR™ Optime™ I Ear Muff with a clear PC faceshield for B rated impact protection (EN166) with a wide field of view.

Part no.	Item	Colour	SNR	Units per pack	Packs per case
G500V5FH	Combination headgear	Hi-Viz yellow	27 dB	1	10

3M™ Comfort Safety Goggles

The Comfort Safety Goggles feature a modern, slim design and are available with two different lens options using either an acetate or polycarbonate lens. They are suitable for a number of different applications where a versatile, comfortable goggle is required.

Part no.	Item	Units per pack	Packs per case
2890\$	Polycarbonate Goggles for grinding and sanding (B rated, EN 166)	4	40
2890SA	2890SA Acetate Goggles for paint mixing and spraying (F rated, EN 166)		10

3M[™] SecureFit[™] SF400 Series Protective Eyewear

Featuring the 3M Pressure Diffusion Temple Technology which provides superior levels of comfort and security of fit. In addition, the SF400 series includes a number of design features which further increase comfort and allow for a more personalised fit. Weighing just 19g, this is one of the lightest models of protective eyewear available. Approvals: EN 166:2001. CE Marked.

Health and safety

Bodyshop repair processes can produce respiratory, hearing and eye hazards. Control measures (such as PPE) should be considered to protect against such hazards.*

Suggested PPE includes:

- 3M Respirators
- 3M Hearing Protection
- 3M Eye Protection

*It is ultimately the responsibility of the employer to select the most appropriate control measures, which could include Personal Protective Equipment (PPE) based on a full risk assessment.

Standard Operating Procedures (SOPs)

Process for success

From metal and plastic repair, to sanding, paint finishing and car clean-up, 3M has the products and repair processes for you. Feel confident your repair is done professionally and efficiently by using our Standard Operating Procedures. These procedures will help you consistently produce quality, time-proven solutions for any of your collision repair needs, including:

- Body Repair
- Bumper Repair
- Sealers and Coatings
- Paint Finishing and Detailing
- Masking
- Paint Preparation
- Painting
- Heavy Duty Trucks

5 reasons to switch to Cubitron™ II abrasives:

- 1. Cuts 30% faster than conventional ceramic abrasives with less technician effort.
- **2.** Lasts twice as long as other high-performance abrasives because of its innovative Precision-Shaped Grain Technology.
- **3.** Products run cooler than conventional abrasives, resulting in lower chance of warping the panel or degrading the metal.
- 4. Delivers a finer, more-uniform finish than conventional abrasives.
- 5. Saves time and money with improved productivity.
